# OUR APPROACH

We know home exterior and interior design is not for every day, and everyone is concerned about the perfect design. This is why our expert team of interior and exterior designers follow a step-by-step approach, keeping a close collaboration with you. Here's how we work-

**1. Project Consultation:** At the initial stage of each project, you will meet with our expert team, who will listen to your requirements, expectations, and desires. This state is about understanding what you want from us. Don't worry; it's completely free to get the initial consultation.

**2. Project Agreement:** Once we understand your requirements and expectations, our team will seek approval for designing with proper documentation. This allows us to ensure that you agree with our design proposal and terms. It also helps us to keep our design track in the right way.

**3. Design & Implementation:** Once you approve, our expert exterior and interior designer team is set for work. First, they develop a concept design and create a 3D visualization using the latest industry-leading software and technology. This helps us show you how the design will look before it is implemented in real life. Once you finalize the design, another team will be on file. They start implementing the exact design with high-quality materials and cutting-edge tools.

**4. Inspection & Handover:** Now, our team has completed the work, and it's time for the final inspection. We maintain a high standard of inspection with 154 quality assurance checks. Once every QC check is passed, we hand over your dream project to you.
